

## Care Compare Five-Star Ratings of Nursing Homes Provider Rating Report for March 2025

Ratings for <b>Park Nursing Home (335093)</b> <b>Rockaway Park, New York</b>			
Overall Quality	Health Inspection	Quality Measures	Staffing
★	★	Not Available <sup>1</sup>	★★

The Five-Star ratings provided above will be displayed for your nursing home on the Care Compare website on or around March 26, 2025. The health inspection rating incorporates data reported through February 28, 2025. The time periods for each of the quality measures that contribute to the Quality Measure (QM) rating can be found in the QM tables located later in this report. The staffing rating is based on payroll-based journal (PBJ) staffing data reported through the third calendar quarter of 2024.

<sup>1</sup>The QM rating for your nursing home has been downgraded or suppressed because of schizophrenia coding inaccuracies in the Minimum Data Set (MDS) data that could not be verified through an audit.

*Your facility has been cited for abuse at harm or higher in the last survey cycle, or at least once at potential harm or higher in each of the last two survey cycles. Care Compare displays an icon for nursing homes with instances of non-compliance related to abuse and their health inspection rating is capped at two stars. For more details, please see the Five-Star Quality Rating Technical Users' Guide that is available at the link on the References page of this report.*

### Helpline

The Five-Star Helpline will operate Monday - Friday **March 24 - 28, 2025**. Hours of operation will be from 9 am - 5 pm ET, 8 am - 4 pm CT, 7 am - 3 pm MT, and 6 am - 2 pm PT. The Helpline number is 1-800-839-9290. The Helpline will be available again **April 28 - May 2, 2025**. During other times, direct inquiries to [BetterCare@cms.hhs.gov](mailto:BetterCare@cms.hhs.gov) as Helpline staff help respond to e-mail inquiries when the telephone Helpline is not operational.

## ***Important News***

### **Adjustments to quality measures.**

Effective with the January 2025 refresh, CMS is unfreezing five quality measures (QMs) that were frozen beginning with the April 2024 refresh. These measures were updated to accommodate recent changes to the Minimum Data Set (MDS). Please refer to the CMS Memorandum [QSO-25-01-NH](#) and the Five Star Quality Rating System Technical Users' Guide for more information about these updates. The impacts to these QMs are as follows:

- Percentage of Skilled Nursing Facility (SNF) Residents Who Are At or Above an Expected Ability to Care for Themselves and Move Around at Discharge (Discharge Function Score) is replacing Percentage of Residents Who Made Improvements in Function (short-stay).
- Percentage of Residents Whose Need for Help with Activities of Daily Living has Increased (long-stay) is respecified.
- Percentage of Residents Whose Ability to Walk Independently Worsened (long-stay) is respecified.
- Percentage of Residents with Pressure Ulcers is replacing Percentage of High-Risk Residents with Pressure Ulcers (long-stay).
- Percentage of Residents with New or Worsened Bowel or Bladder Incontinence is replacing Percentage of Low-Risk Residents who Lose Control of their Bowels or Bladder (long-stay; not included in the QM Rating).

To address these changes in measure specifications, the scoring cut points for each of the four measures included in the Five-Star QM rating were recalculated to achieve an even distribution across scores. Also, to minimize the potential disruption associated with these changes, the QM rating cut points were adjusted to maintain the same overall distribution as the October 2024 refresh.

## Health Inspections

The Five-Star health inspection rating listed on the first page of this report is based on three cycles of survey data and three years of complaint and focused infection control inspections and incorporates data reported through February 28, 2025.

### *Your Health Inspection Rating*

Provided below are the survey dates included in the calculation of the health inspection rating for your facility. The dates listed include standard survey dates as well as dates of complaint inspections and focused infection control inspections that resulted in deficiencies. For more detailed information about the deficiencies cited on each survey, please visit: <https://data.cms.gov/provider-data/>. This website updates on the same day as the Care Compare website. Any additional revisit points can be found in the 'Provider Information' table at the link provided above.

*Health Inspection Rating Cycle 1 Survey Dates:*

*Health Inspection Rating Cycle 2 Survey Dates:*

September 22, 2021                      May 18, 2023                      November 2, 2023

*Health Inspection Rating Cycle 3 Survey Dates:*

February 22, 2019

*Total weighted health inspection score for your facility: 50.7*

<b>State-level Health Inspection Cut Points for New York</b>				
<b>1 Star</b>	<b>2 Stars</b>	<b>3 Stars</b>	<b>4 Stars</b>	<b>5 Stars</b>
>50.67	32.68-50.67	20.68-32.67	10.68-20.67	0.00-10.67

Please note that the state cut points are recalculated each month, but the total weighted health inspection score for your facility is compared to the cut points only if there is a change in your score.

**Citations under IDR/IIDR**

Below is a listing of health inspection citations for your nursing home that are under IDR or IIDR. These citations are reported on the Care Compare website; however, they are not included in the health inspection rating.

<sup>2</sup>This measure includes some imputed data because there are fewer than 20 resident assessments or stays across the four quarters. This value is used in calculating the QM points and used in the QM rating calculation but will not be displayed on Care Compare.

<sup>3</sup>The observed rate is the actual rate observed for the facility without any risk-adjustment; the expected rate is the rate that would be expected for the facility given the risk-adjustment profile of the facility; and the risk-adjusted rate is adjusted for the expected rate of the outcome and is calculated as (observed rate for facility / expected rate for facility) \* US observed rate. Only the risk-adjusted rate will appear on Care Compare.

<sup>1</sup>These measures are risk adjusted.

<sup>2</sup>This measure includes some imputed data because there are fewer than 20 resident assessments or stays across the four quarters. This value is used in calculating the QM points and used in the QM rating calculation but will not be displayed on Care Compare.

<sup>3</sup>The observed rate is the actual rate observed for the facility without any risk-adjustment; the expected rate is the rate that would be expected for the facility given the risk-adjustment profile of the facility. For successful community discharge, the risk-adjusted rate is calculated as (predicted rate / expected rate) \* US Observed rate and is referred to as the risk-standardized rate. For rehospitalization and emergency department visits, the risk-adjusted rate is calculated as (observed rate / expected rate) \* US observed rate. Only the risk-adjusted or risk-standardized rate will appear on Care Compare.

<sup>4</sup>For this measure, this value is the National Benchmark, rather than the national average of the risk-adjusted rate. NR = Not Reported. The expected rate is not reported for this measure.

#### Additional Notes Regarding the Quality Measure Tables

"d<20" means the denominator (number of eligible resident assessments) for the measure summed across all four quarters is less than 20. If sufficient data are available for imputation, a four-quarter average is displayed. This value is used in calculating the QM points and used in the QM rating calculation but will not be displayed on Care Compare.

"NA" is reported one of three reasons: 1) data are not available; 2) the denominator (number of eligible resident assessments or stays) summed across the four quarters is less than 20 and there are not sufficient data for imputation; or 3) too few measures have an adequate denominator to calculate a rating.

If the denominator for a measure is less than 20 in an individual quarter, the data may be displayed here, but will not be included in the MDS Quality Measures file on PDC.

#### SNF Quality Reporting Program (QRP) Measures:

Three of the short-stay QMs used in the Five-Star QM rating calculation are SNF QRP measures: "Percentage of SNF residents with pressure ulcers/pressure injuries that are new or worsened", "Percentage of SNF residents who are at or above an expected ability to care for themselves and move around at discharge", and "Rate of successful return to home or community from a SNF". There are additional SNF QRP measures that are not included in the Five-Star ratings but are displayed on Care Compare. Information about these measures can be found on separate provider preview reports in the QIES mailbox. Please watch for communication from CMS on the availability of these reports. Additional information about the SNF QRP measures can be found in the Quality of Resident Care section on the References page of this report.

## Staffing Hours per Resident Day

PBJ data for **October 1 to December 31, 2024** (submitted and accepted by the February 14, 2025 deadline) are being used to calculate the staffing levels for three months starting with the **April 2025** Care Compare website update. The table below includes the reported, case-mix and adjusted staffing levels for your facility, using the PBJ data for **October 1 to December 31, 2024**. The case-mix staffing values are based on resident acuity levels using the nursing Case-mix Groups and corresponding nursing Case-mix Indexes from the Patient-Driven Payment Model (PDP) The Five-Star Rating Technical Users' Guide contains a detailed explanation of the staffing rating and the case-mix adjustment methodology. The table also shows the weekend staffing levels (total nurse and RN) for your facility. Below the table is the average resident census for your facility, as well as details for calculating case-mix and adjusted staffing values.

Staffing Levels for October 1 to December 31, 2024 for Provider Number 335093						
	Reported Hours per Resident per Day (HRD)	Reported HRD (Decimal)	National Average: Reported HRD (Decimal)	Case-Mix HRD	National Average: Case-Mix HRD	Case-Mix Adjusted HRD
<b>All days</b>						
Total nurse (RN, LPN, LVN, and Nurse Aide) hours	2 hours and 49 minutes	2.810	3.865	3.700	3.842	<b>2.917</b>
RN hours	22 minutes	0.370	0.670	0.642	0.666	<b>0.385</b>
LPN/LVN hours	38 minutes	0.631	0.870	0.833	0.865	<b>0.655</b>
Nurse aide hours	1 hour and 49 minutes	1.809	2.325	2.225	2.311	<b>1.878</b>
Physical therapist <sup>1</sup> hours	3 minutes					
<b>Weekend (Saturday and Sunday)</b>						
Total nurse (RN, LPN, LVN, and Nurse Aide) hours	2 hours and 29 minutes	2.490	3.423	3.277	3.402	<b>2.586</b>
RN hours	14 minutes	0.229				

<sup>1</sup>Physical therapist hours are not included in the staffing rating calculation.

The average number of residents for your facility (based on MDS census) for October 1 to December 31, 2024 is **173.9**.

The Nursing CMI ratio for your facility is **0.957**. This is calculated as your facility's weighted average nursing case-mix index **1.309** divided by the national average nursing case-mix index **1.367**.

The Case-Mix HRD values are calculated as: Nursing CMI Ratio \* the national average of reported HRD.

The Case-Mix Adjusted HRD values are calculated as: (Reported HRD/Case-Mix HRD) \* the national average of case-mix HRD.

### Availability of Reported Staffing Data

Some providers will see 'Not Available' for the reported hours per resident per day in the table above and a staffing rating may not be displayed for these facilities. There are several reasons this could occur:

1. No MDS census data were available for the facility.
2. No on-time PBJ staffing data were submitted for the facility.
4. No nursing hours were reported (0 HRD).
5. Total reported nurse staffing was excessively high (>12.0 HRD).
6. Total reported nurse aide staffing was excessively high (>5.25 HRD).
7. A CMS audit identified significant discrepancies between the hours reported and the hours verified, or the nursing home failed to respond to an audit request.
14. No nursing hours were reported on weekends (0 HRD).
15. Total reported nurse staffing on weekends was excessively high (>12.0 HRD).
16. The total reported nurse aide staffing on weekends was excessively high (>5.25 HRD).
18. Other reason.

### PBJ staffing summary for October 1 to December 31, 2024

The following table summarizes the nurse, physical therapist and administrator data that your facility reported to the PBJ system for the quarter. The data include both exempt and non-exempt employees, as well as agency staff. Please note that values for hours are rounded to the nearest integer. As with the other information, facilities should review this information to ensure they are reporting complete and accurate data for future submissions.

Staffing Category	Job Code(s)	Total number of hours that your facility reported for the quarter	Number of days in the quarter on which your facility reported ANY hours

### PBJ staffing data report for October 1 to December 31, 2024

The following table summarizes the information that your facility reported for nurse staffing only (PBJ Job codes 5-10 and 12) as listed in the PBJ nurse staffing summary for **October 1 to December 31, 2024**. We believe these are indicators of the completeness of the data submitted by your facility and the plausibility of the values reported. Indicators 1 and 2 show whether or not a facility has reported nurse staffing information for each day in the quarter. If a facility did not report hours for nursing staff for each day, we believe that may indicate that the facility has not submitted complete data.

For days that no nursing or RN staff hours were reported (indicators 1 and 2), we have included a list of those dates in listings 1 and 2, located at the end of this report.

Indicator	Description	Number of days
1	Number of days in quarter on which your facility reported no nursing hours (i.e. no aide <sup>1</sup> , LPN, or RN) but on which there were residents in the facility	0
2	Number of days in quarter on which your facility reported no Registered Nurse (RN) <sup>2</sup> hours but on which there were residents in the facility	0

<sup>1</sup>Includes the following job codes: Certified nurse aide (job code 10) and medication aide/technician (job code 12). Aides in training are not included.

<sup>2</sup>Includes the following job codes: RN DON (5), RN with administrative duties (6), and RN (7).

## Staffing Turnover

PBJ data from July 1, 2023 to December 31, 2024 are used to calculate annual nursing staff and RN turnover measures and to report the number of administrator turnovers among eligible administrators in the 12-month reporting period between October 1, 2023 to September 30, 2024. PBJ does not collect information on employee termination dates; instead a turnover is identified based on gaps in days worked. The turnover measures include employees and agency staff that have worked at least 120 hours at your facility in the 90-day period starting from the first observed workday between July 1, 2023 to March 31, 2024. Individuals no longer associated with a nursing home are defined as eligible employees who have a period of 90 or more days during which they do not work at all. The data listed below report the nursing, RN, and administrator turnover measures for your facility October 1, 2023 to September 30, 2024. (Note that data from 2023Q3 - 2024Q1 are used to identify individuals who are eligible for the turnover measure, while data from 2024Q4 are used to identify individuals who had a 90-day or more gap in days worked that started within the last 90 days of 2024Q3.)

These turnover measures will be posted on Nursing Home Care Compare starting with the **April 2025** update. The turnover measures are updated quarterly using a rolling 12-month period. Detailed information on how turnover is calculated is available in the Technical Users' Guide. Find the link on the References Page of this report.

<sup>1</sup>*The number of eligible staff is based on a count of the number of eligible 'employment spells.' For more details on the methodology used to calculate nursing staff turnover, please see the measure specifications, available at the location listed in the references below.*

<sup>2</sup>*Some providers will see "Not Available" on the Care Compare website for one or more turnover measures if there is a "No" along with a code listed in this column of the table.*

## Availability of Turnover Data

Some providers will see 'Not Available' for one or more of the turnover measures in the table above or on Care Compare. There are several reasons this could occur:

### Nursing Staff and RN Turnover Exclusion Codes

1. No data or invalid PBJ nursing data submitted for one of more quarters between July 1, 2023 to December 31, 2024. See the table below for the quarters with missing or invalid PBJ data.
2. Fewer than 5 eligible nurse (or RN) employees or agency staff.
3. 100% total nurse turnover on a single day. If you see this code in the table above, up to two dates on which it appears your nursing home had 100% turnover on a single day are listed below. In this case, you may need to submit data to link employee identifiers. See additional information on the References page of this report.
18. Other reason.

### Days with 100% turnover for all nursing staff

*No Dates with 100% nurse turnover*

## Availability of Turnover Data (continued)

### Administrator Turnover Exclusion Codes

1. No data or invalid PBJ nursing data submitted for one of more quarters between July 1, 2023 to December 31, 2024. See the table below for the quarters with missing or invalid PBJ data.
2. No administrator hours were submitted for one or more quarters between July 1, 2023 to December 31, 2024. See the table below for the quarters with no administrator hours.
3. No eligible administrator employees or agency staff.
4. Too many administrators: there are 4 or more days in one or more quarters between July 1, 2023 to December 31, 2024 with five or more different people reported under job code 1 (administrator) on the same day.
18. Other reason

Your facility's submission of valid PBJ nursing data and administrator hours for quarters used by turnover measures						
	2023Q3	2023Q4	2024Q1	2024Q2	2024Q3	2024Q4
Valid PBJ data submitted	Yes	Yes	Yes	Yes	Yes	Yes
Administrator hours submitted	Yes	Yes	Yes	Yes	Yes	Yes

*Note that in rare cases, turnover data may be reported on Care Compare even if one or more of the indicators of valid PBJ data in the table above is "No". This may occur if the data were later verified by a CMS audit.*

## MDS Census Calendars for October 1 to December 31, 2024

On the following page are calendars with the daily census values for your facility, based on the assessments submitted (for all payer types) and calculated using the method described in the Five-Star Quality Rating System Technical Users' Guide. Days of the month are shown in black in the upper left hand corner, while the daily census value is shown in blue in the lower center of each day.
